

### SDGs on the eyes of GOH:

At Glimmer of Hope (GOH) we believe on the Sustainable Development Goals (SDGs) that the United Nations (UN) mapped after addressing the most significant worldwide challenges to achieve the desired impact. Therefore, as Non-Governmental Organization (NGO) we aligned our strategic planning with the SDGs and focused our effort to address and solve the challenges that faces the Visually Impaired (VI) people in Sudan on the below SDGs.

**#4 Quality Education:** GOH core vision is to ensure the right of visual impaired people to have fair education through helping to provide quality education and promoting learning opportunities for visual impaired people in their education journey in order to generate a strong, confident, independent, Self-reliance generation of visual impaired people.

4 QUALITY  
EDUCATION

10 REDUCED  
INEQUALITIES

**#10 Reduce Inequalities:** By empowering the Visually Impaired people through education GOH strives to create qualified and independent Visually Impaired people. Which it shall eliminate the discrimination, and reclaim their right to have the same opportunities and privileges that sighted people has.

**#17 Partnership For The Goals:** in GOH we believe in the power of partnership which saves the effort, brings creative ideas, and shares the resources to achieve the desired impact in more effective and efficient approach. That's why GOH creates and obtains different partnership with all the respective stakeholders.

17 PARTNERSHIPS  
FOR THE GOALS

### GOH Indirectly tickles:

5 GENDER  
EQUALITY

**#5 Gender Equality:** According to the latest National Censes that published in 2013 there is about 42,622 visually impaired children who never attended schools and 54% out of this percentage are females. GOH works to provide equal educational opportunities for visually impaired children in Sudan and raise the awareness of the local community.

**#8 Decent Work and Economic Growth:** At GOH, we are strong believers that the effort we are investing on empowering the right of education to the visually impaired people will have a significant impact on the long-term. Because we are building a very comparative and qualified VI segment. Which they will utilize this knowledge with their extraordinary skills to participate on the developing of whole country.

8 DECENT WORK AND  
ECONOMIC GROWTH
